Reasons for Allowance

Claims 1-20 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Yamasaki et al., taken alone or in combination of other references, does not teach or fairly suggest a semiconductor device having a first operational mode comprising, among other things, a bond pad for receiving an external potential to be used as the second reference potential in the first operational mode; a test mode of operation in which the bond pad receives an external potential to be used as the first reference potential (claims 1 and 15); wherein in the normal operation, the selection circuit provides a potential received on the bond pad to the second node and in the test operation the selection circuit provides the potential received on the bond pad to the first node (claim 8), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
